PROFESSIONAL SUMMARY

Junior Software Developer with 1.5 years of experience in web and backend development. Proficient in PHP, Python, CodeIgniter, Laravel, MySQL, and JavaScript. Skilled in developing web applications, REST APIs, database solutions, debugging, and implementing new features. Experienced in project documentation, application support, and delivering client-focused software solutions.

EXPERIENCE

Junior Software Developer

MVG Digital Consulting Pvt. Ltd.

April 2025 – Present

Chennai, India

- Developed and maintained web applications and backend services for business requirements
- Built REST APIs, database queries, and application integrations for various modules
- Implemented new features, enhancements, and workflow changes based on project requirements
- Debugged application issues and optimized existing functionality to improve reliability and performance
- Collaborated with team members to deliver software features and provide ongoing application support

TECHNICAL SKILLS

Programming Languages: PHP, Python, JavaScript, SQL

Frontend: HTML, CSS, React.js

Frameworks: CodeIgniter 4, Laravel

Database: MySQL, PHP Myadmin

Tools & Technologies: Git, GitHub, REST APIs, AJAX

PROJECTS

Alumni Portal Website

Full-Stack Web Application

PHP, CodeIgniter 4, MySQL, JavaScript, HTML, CSS, WhatsApp API

- Developed a dynamic alumni portal with an admin panel for managing website content and application workflows
- Built dynamic sections including banners, events, newsletters, announcements, gallery, and alumni profiles, allowing administrators to manage content without code changes
- Implemented alumni registration, mentor management, event registration, payment handling, and alumni management features
- Integrated WhatsApp API and Amazon SES for automated alumni invitations, notifications, and event communications
- Managed end-to-end development including database design, backend business logic, REST APIs, admin workflows, and responsive UI development

Smvrch Website

Full-Stack Dynamic Website

PHP, CodeIgniter 4, MySQL, JavaScript, HTML, CSS

- Developed a fully dynamic website with a dedicated admin panel for managing website content and sections
- Built dynamic sections including banners, slider images, Highlight images, Concert hall gallery, Signature Events, Faq
- Implemented admin functionality to add, edit, update, and delete website content dynamically without making code changes
- Developed reusable backend modules and database-driven functionality to manage and display content across the website
- Developed a contact form that stores submitted enquiries securely in the MySQL database and allows administrators to view and manage submissions through the admin panel
- Integrated email notifications for contact form submissions to automatically notify the concerned team when a new enquiry is received

- Managed end-to-end development including database design, backend logic, admin panel functionality, dynamic content management, and frontend development

Multi-Discipline Class Management System

Web Application

PHP, CodeIgniter 4, Keycloak, MySQL, REST APIs

- Developed a class management system with role-based access for Students, Teachers, Parents, and Administrators
- Implemented user authentication and authorization using Keycloak with role-based access control
- Developed REST APIs for managing students, teachers, parents, fees, class schedules, and session details
- Integrated MySQL with the backend for efficient and secure data storage and retrieval
- Implemented secure authentication and authorization workflows for multiple user roles

Ticketing & IT Service Management System – MASSET / HRMS

IT Service Management System

PHP, MySQL, JavaScript, HTML, CSS

- Developed an IT Service Management and Ticketing System for managing Service Requests and Incident Tickets across departments
- Implemented ticket workflows including creation, assignment, acknowledgement, work in progress, pending, closure, duplicate handling, and incident reopening
- Built role-based dashboards and access controls for Admins, Managers, Agents, Department Heads, and users
- Developed ticket assignment, filtering, search, status management, notifications, replies, and audit/activity history
- Implemented a creator-based incident re-open workflow with mandatory reasons and role-based restrictions

Vendor Lifecycle Management System – Vendor Flow

Procurement & Vendor Management System

PHP, MySQL, JavaScript, HTML, CSS

- Developed an end-to-end vendor management system covering vendor registration, onboarding, verification, approval, and procurement workflows
- Implemented vendor onboarding with invitation, email verification, mobile verification, Aadhaar, PAN, GST, bank details, products and services, and document verification
- Developed RFQ management with RFQ creation, item selection, existing vendor selection, new vendor invitations, and quotation workflows
- Implemented secure token-based vendor invitation links with expiry and separate workflows for new and existing vendors
- Built role-based approval workflows with onboarding status tracking, clarification, rejection, approval, and vendor verification stages

EDUCATION

Anna University Regional Campus Madurai

2024

Bachelor of Engineering in Mechanical Engineering, CGPA: 8.0

LANGUAGES

Languages: English, Tamil
